The objective of establishing a Travel Alert System is to allow an easy and timely dissemination of information about crisis situations, emergencies or catastrophes affecting different parts of the world, in order to raise the awareness of the population and to facilitate their decision when travelling abroad.

Level 2 represents that the threat to personal safety is elevated. Macao residents planning to travel to or already in the destination should reconsider travelling at this time. It is suggested to avoid non-essential travel to the destination.

Macao residents planning to travel or already in the destination should be aware of the severity of the situation and limits that any official assistance can be provided there. It is advised to avoid travelling to the destination and in certain situations, follow the advice issued by the Tourism Crisis Management Office (GGCT) to leave the destination.
